## **2. TODO & IMPORTANT INFO**

- [TODO] make Championship Leg adjustable (now still 2 Legs)
- Please note that to have this mod working you MUST INSTALL SMART FUEL MOD [v.14 or later] and CAR DAMAGE INDICATOR Mod [v.3.0 or later]. Else, it will not working.
- You can find Smart Fuel Mod and Car Damage Indicator at my page at [www.gta5-mods.com](http://www.gta5-mods.com)
- This mod was originally one of my game projects for android, but i managed to have it ported into GTAV mod.
- This mod is still on early stage of development, to port the main script i need over 30 days to finished.
- This version has 3 rally tracks and 2 race modes (explanation you can find below), i will regularly upload this mod after finishing the other tracks, so stay tuned.
- As an info, to create one fully usable and proper track i need about 3 full days, so please be patient, i do my best as i can but still im just a newbie modder. still lack of skills.
- Since this mod has alot (12) of race modes and in this version i just finished the only two of them, the rest will be waiting for development as my priority now is completing all the unfinished tracks.

### **3. CONTRIBUTORS**

We would be very glad if all of you can also contribute to this mods. If you do like this mod you can contribute by put comments, hit Like button, Rate us and also follow us on GTAV-mods.com to make sure you will get notification on every updates since there is still a lot of things that we will put into this mod.

If you like this mod even more, you can also donate us via Paypal. If you're Indonesian you can also donate for //mrchazta personally by mendonasikan pulsa simpati di nomor 082134848863. You also can contribute by uploading video of this mod.

Further we will make this mod translated into any languages. So if you want to help us translating this mod you can contact us and we will send you the vanilla script file to be translated. We intend this mod translated to any languages with no limitations.

Our goal is just to make the most complex and realistic Grand Theft Auto fuel mod ever and we would never did that without all of your supports.

=====

#### **4. TASK BEFORE ASK**

---PRIMARY, you MUST:

- Keep in mind that all of Mod programmers are intend to upload the working Mods,
- Keep in mind that before any Mods released and you can download it, the website is checking and testing it first for viruses and any other aspects,
- Have LATEST .LUA, ScriptHookVDotNet Crosire and ScriptHookV Alexander placed inside your GTAV installation folder,
- Have "NATIVEUI" placed on your "GTAV/script" folder
- Have "VC Redist 2013" and "VC Redist 2015" installed on your system,
- Keep in mind that Rockstar has blocked the game to be mod-able in latest GTAV Patch and sadly if you want to enjoy the mods you have to downgrade your game version (You can search this on GTAV forums)

---SECONDARY, you BETTER:

- Not forget to update your VGA driver and it would be better if you have the latest version
- Have vital update of your version (ex:kbxxxx) for windows user to make sure everything is running fine as some VC Redist version needs some system update,
- Have Netframework 3.5, 4.0, 4.5, 4.5.1, 4.5.2, and 4.6. installed on your system

---OPTIONAL, you can also TRY:

- remove all any other .LUA mods then try to install any mods alone there and see what is happening then.
- To load the game via SAVE GAME from MENU (not restart the game) if any case of mods are not loaded properly (this sometimes happens).
- To Exit the game, restart your system (to free up some memory load) and start your game normally.

## 5. INTRODUCTION

The first idea was so simple, i want to play a realistic racing games in GTAV. I realized that out there is already a lot of great racing mod for GTAV compared to this mod but once again i'm just trying not to become mainstream as always... just want to make something different with the same kind of mod out there... So i take a look at my game bunker and found Need for speed, Gran Turismo and DIRT and GTA san andreas with tons of gambling mini game. then i asked to my self, *"What will it become if styles of those three great racing game compiled into one mod and can be played as a gambling game in a great big open world game game like GTAV?"* And i answered to my self: *"It will become a lot of aspirine"*. Then i remember i had one of those projects on my corona and then about 30 days-of-not-sleeping-too-well later it was ported to this mod. OK Let's cut this crap.

Inside this mod you can compete in 12 kind of race modes:

- Single race rally run
- D.I.R.T Rally championship
- Single GT Race
- D.I.R.T GT Championship
- D.I.R.T Speed trap
- D.I.R.T The Run
- Marathon estafette
- Circuit
- Head to head Battle run
- 1 on 1 Drag race
- Freestyle
- Free practice

You can also gambling here as you must put wager and bets on every races, Beside of 12 race modes and gambling you can also choose your sponsorship and also pick and select crew and Co Driver.

Go to Mount Chilliad [near the tunnel] and you'll see the community. You have to register first.

For keyboard user use [ASDW] navigate, [E] enter and [R] to back,

for controller user use [LEFT ANALOG] navigate, [X] enter, [O] to get back.

If you expect you will find blips and markers along the race then you're wrong. you can ask where is the startline?, where the heck is the paddock?, this mod not gonna show you that. You'll need your race instinct here.

## 6. MANUALS

D.I.R.T V [Desilvi International Rally Tournament] is a mixture mod of racing style from 3 great racing games (DIRT, Need for speed, and Gran Turismo that contains a gambling taste like GTA San Andreas implemented in a big great open world game GTAV. Ok these are the features:

### **Controls**

Keyboard:

Navigate : WASD

Enter / Back : E / R

Controller [Playstation]:

Navigate : Left Analog

Enter / Back : Cross / Circle

:

### **Registration Menu**

#### **A. Race Modes**

##### **1. Single Race Rally Run**

Compete in a Single race Rally run on rally track. You can either choose sponsorship or not to compete.

Race Prize

1st place earn 2x of wager

2nd place earn 1.5 x wager

3rd place earn 1.25 x wager

4th place 0

5th place 0

##### **2. DIRT Rally Championship**

Compete in DIRT Rally Championship on Rally tracks. Championship will be held 2 times for each track. There are two kind of points given on Championship mode for every races, RACE POINT and HEALTH POINT.

Race Points:

1st place : 20 pts

2nd place : 15 pts

3rd place : 10 pts

4th place : 5 pts

5th place : 0 pts

You will get health points based on percentage of your car health / 10 on each races. if your car health is 90% then you will get 9 HP and it will be added with Race points. So that you have to be more careful in every race.

### **3. Single Race GT**

Compete in single race GT mode

### **4. DIRT GT Championship**

Compete in DIRT GT Championship race mode in 10 laps. Choose your Pitstop to change tires and refueling. choose your tyre carefully as it will affects your vehicle on race. [Gran Turismo Championship style]

### **5. DIRT Speed Trap**

Just make sure you're on your fastest speed while passing those cameras [Need For Speed Most Wanted style]

### **6. DIRT The Run**

Compete a long race along Los Santos with other 150 Opponent while cops are on your ass and become the number one [Need For Speed The Run style].

### **7. Marathon Estafette**

Race to finish line with random provided cars along the checkpoints. This will test your adaptation driving skills to it's limit [Invented by my self]

### **8. Circuit**

Compete a single race with three laps with other 3 opponents.

### **9. Head to head battle run**

Compete with your opponent one on one to the finish line and take whatever it takes to claim your victory!! [Need for Speed Most wanted Boss Battle style]

### **10. 1 on 1 Drag race**

Drag your opponent along the tunnel.

### **11. Freestyle**

Perform a donut, drift, 180 handbraking, 360 rotation or whatever it takes to make your point higher than other contestants in a freestyle circuit. [DIRT 3 style]

### **12. Free Practice**

Test your driving skills here.

## B. Sponsorships

You can choose sponsorship for every races. Each sponsorship have their own profile like Target and minimum car damage for each race. If you fail to achieve your sponsorship you have to pay your sponsorship multiple times of race bets as a penalty. But if you achieve their target besides you will get race prize you will also earn a multiple times of your wager from your sponsorship. However in Single race you can choose either to take sponsorship or no but you can't compete in Championship mode without choosing sponsorship

## C. Tracks

There are basically 3 different tracks on this mod,

1. Rally tracks [Track for Rally race mode]
2. GT Tracks [Track for GT [asphalt] racing mode]
3. Special tracks [Track for Special race like Drag, Drift and Gymkhana freestyle race]

[S.T.S.] Track means the track is starting from Starting grid and finish at Start line (Podium location) and for [S.T.F.] Track means the track is starting from Starting grid and finish at finish line on other location.

### Wager & Bet

Pour your sense of gambling here as you can set wager for every kind of races. Use navigation control LEFT or RIGHT for adjust wager and navigation control UP and DOWN to adjust faster.

## D. Gameplay Class

There are Five game play level. Choose what racer you are, prove it here. However you can only choose gameplay level only when you are in any Single Races.

## E. Crew & Co Driver

Pick up and select your Crew and Co Driver carefully. Each of Crew has their ability. Works the same way with Co Driver, some Co driver can make police wanted Dissappear and some can make your car go faster so choose wisely.

## F. Enter Race

Enter here whenever you are ready to hit your throttle.

## G. About

You can find what features will be released and already released in this section.

## Starting a Race

### A. Register

To start a race you have to register first at the registration booth, select what races you want to compete then hit "ENTER RACE",

### B. Starting Grid

After you complete your registration, go to the starting grid to start race.

#### 1. Registration Check

Your registration will be checked here

#### 2. Vehicle Check

After registration check is complete, now it's your car turn for inspection. If your car doesn't meet minimum of Race Requirements you can't continue to your race.

#### 3. Race Requirements

Fuel : 75 %

Car health : 100%

Engine Oil quality : 75%

Transmission oil quality : 75%

Tyres quality : 75%

You can use Smart Fuel Mod [V.15 or later] station near the area to solve your problems.

### C. Race

Race and become the number one.

### D. Paddock

After you cross the finish line, go to the Paddock to see race results.

## Penalties & Disqualified

### 1. Cutting the track

You have to stay on your race line as long as possible while racing. This mod uses checkpoint system at some corner on tracks, so if you cut your track or using trainer for teleporting you will be caught as track cutting. The punishment is Disqualified from the race. In Championship mode you will get ZERO Race Points and Health Points for that race.

### 2. Exiting your car

You can not get out from your car while in race session, if you do this the consequence is Disqualified. In Championship mode you will get ZERO Race Points and Health Points for that race.

### 3. Cheating your car health

I assure you that you can not cheating your car health in this mod while you are racing. If you read this and still try to cheat your car health you will be disqualified from your race. In Championship mode you will get ZERO Race Points and Health Points for that race.

### 4. Invisible / invulnerable car

For now preventing this feature is not added.

## Quitting a Championship event

If you want to quit your current Championship or a long-held event, you can quitting your current event by pressing [CTRL+SHIFT+Q] or [R3+L3] at registration booth.

## 7. INSTALLATION

Just copy all of the file inside mrchaztaDIRT folder into "Script/Addins" folder inside your game installation folder.

If you can't find any "Addins" folder inside your game then you should read point 4 TASK BEFORE ASK or in instant you have to install Scripthookvdotnet and lua plugins..
